DETAILED ACTION

Response to Amendment

Examiner acknowledges response by applicant's representative received 8/20/03, however, examiner is somewhat confused by the response. Applicant's representative did not respond to the office action of 7/25/03 (as required by the MPEP).

Examiner would like to further respond to opening remarks of applicant's representative concerning claim 9. Examiner would like to point out that the remarks are now moot since prosecution has advanced beyond that final office action of 12/31/02.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10, 11, 13 & 15-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one

Art Unit: 3711

skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9, 12, 14 & 19-25 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Vancura.

Vancura discloses Gaming Machines with Bonusing. In his game he teaches the playing of a bonus game in a secondary machine adjacent to a primary machine.

Vancura's invention substantially teaches the limitations as claimed.

Referring to Claims 1, 3, 7, 9, 19 & 23-25

Vancura teaches:

- that the primary machine acts as a traditional slot machine (col. 18, lines 22-24).
- that the primary gaming machine can be a suitable gaming machine, such as, slot, poker, keno etc.;

and

- the accumulating of winnings in an award meter (col. 17, lines 44-54).

Referring to Claims 2, 8 & 20

Vancura teaches:

- a secondary machine (claim 1);
- a bonus qualifying signal, to play a bonus game on the secondary machine, when a predetermined combination of symbols is obtained (col. 18, lines 24-28);
- determining the winning values and accumulating winnings in the specific winning machine (claim 1).

Referring to Claim 4

Vancura teaches:

- a bonus-qualifying event determined after the primary machine is activated (col. 3, lines 18-20 and col.4, lines 55-64).

Referring to Claims 5, 6, 12, 14, 21 & 22

Vancura teaches:

- a secondary machine (claim 1);
- the use a processor to facilitate all the functions of the primary (master) and secondary (slave) machines (see figure 50);
- a bonus/jackpot (claim 12);
- collecting the game results of the secondary machine in the primary machine (col. 16, lines 62-67);

- that the primary machine can be used as a slot, poker or keno machine (col. 5, lines 14-20).

Response to Arguments

Applicant's arguments filed 8/20/03 have been fully considered but they are not persuasive. Applicant extensively argues the differences between the cited references and the claimed invention. Applicant, however, fails to claim anything that is novel compared with the teachings of the cited reference.

The new claims 19-25 were added but do not seem to present anything novel when compared with the cited reference and other representations well known in the art.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3711

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takenouchi et al. (528) & (995), Traci and Barrie et al. are cited to show the state of art with respect to features of the claimed invention.
